Location

Dhaka, Bangladesh

EDUCATION

B.Sc. in Computer Science & Engineering (CSE)

United International University

Expected Graduation: 2027

SKILLS

- C
- C++
- Java
- Python
- HTML (basic)
- CSS
- Figma

OBJECTIVE

Motivated Computer Science undergraduate seeking a Software Developer / Engineer Intern position to apply strong programming fundamentals and hands-on project experience in building practical, real-world software solutions.

PROJECTS

University Admission Chatbot

Python | *FastAPI*

Developed an AI-powered chatbot to answer university admission-related queries, built using Python and FastAPI for fast and reliable backend responses.

AI Cancer Detection — Final Year Project

Python | *Machine Learning*

Working on an AI-assisted system for cancer prediction and diagnosis, applying machine learning techniques to support early and accurate detection.

STRENGTHS

Strong foundation in core programming languages, practical experience applying AI/ML concepts to real projects, and working knowledge of UI/UX design tools such as Figma — bridging both development and design perspectives.
